Vision

*“To bring you the world’s finest products
in architectural & designer hardware
and make it available & affordable”*

DISCLAIMER

PAG reserves the right to discontinue or add any product, finish or design without prior notice. The sketches/drawings and images appearing in this price list have been included solely for guidance purposes only. They are not true to scale and do not represent any precise or binding design of the product. PAG is a registered trademark under the trademarks act. Copying or Duplicating the products is strictly prohibited. Only authorized resellers, franchise & distributors appointed by the company are allowed to possess, trade or sell products offered by and from the company. Illegal possession of the goods will result in prosecution.

AVAILABILITY

PAG endeavours to keep sufficient stock of the products mentioned in this price list. But orders falling out of average, if not in stock, would be intimated and supplied in due course as specified or agreed by customers in written. PAG requests customers to reconfirm stock position before commitment to the customers.

PRICES

All previous prices are superseded by this List Price along with price agreements of any kind with any party. All prices are subject to change without notice. All prices mentioned are Maximum Retail Prices (M.R.P.) i.e. inclusive of all taxes for the end user. All prices are Ex-works and in Indian Rupees (INR) only. The validity period of the price list also applies in case of products that are not included in this price list. All the information provided is subject to error and printing mistakes for which no liability will be accepted.

TAX & FREIGHT

Packing, Forwarding & Bardan Charges have to be borne by the buyer. VAT for Maharashtra and CST for other states would be applicable after the standard discount on the MRP. Additional Freight charges for prompt deliveries by air i.e. courier or flight charges has to be borne by the buyer along with necessary forms. The Tax rate will be subject to change as per the government notifications.

ORDERS

Receipt or Possession of this Price List does not grant approval to quote or purchase PAG Products. All orders will be fulfilled by the acceptance of PAG quantity at PAG Price at the time of order. PAG will accept orders via phone, email, fax, sms or courier. PAG reserves the right to decline orders in which the price or quantity of goods is not satisfactory. Any modification to the standard product configuration is considered to be a special order. For a special order the price will vary and no credits will be issued for returned special orders unless authorized by the Directors of PAG. Delivery period of such orders will be decided depending upon the manufacturing process time. Accuracy of phone orders will be determined by the receipt of a written sale order form and an acceptance of the same. The order reference issued on the form will be used for tracking the goods.

INVOICE

The final dispatch invoice will be sent to you for confirmation just before the dispatch and a written confirmation for the same will be required by you of that invoice. Any changes in the quantity, price or product etc. has to be rectified immediately and the goods will leave the warehouse only after your confirmation. Any changes will not be accepted later.

CANCELLATIONS

No orders can be cancelled after written or oral confirmation.

MINIMUM CHARGE

The expense for handling an order below INR 5000 will be INR 300 per invoice.

C FORM / H FORM (applicable for buyers outside Maharashtra only)

Cforms and Hforms have to be issued and has to be received by us from your side before 31st May of the previous full financial year. If not received by us then the party will be charged for the difference amount of the VAT, Penalty and Interest.

DELIVERY

We endeavor to make prompt shipment of all orders, but we shall not be held responsible for any loss or damage resulting from delay in filling orders due to causes beyond our control, including delivery of material to us. All responsibility ceases off the goods after it has left our warehouse. Goods in transit are at the risk of the buyer.

EXPORT SHIPMENTS

Orders for users outside the Indian Continent will be by quotation from the Export Department to cover any additional import duties, freight, communications, and insurance cost. All Shipments are F.O.B. factory via carrier we select. Single or combined shipments including all products and brands will be considered for free freight with orders at or above \$6000 net. These freight terms apply only to a single destination with sea freight.

CLAIMS

All claims due to errors or defects must be submitted, in writing, within 15 days after receipt of goods. If PAG is responsible then adjustments will be made and decision for goods will taken after written approval from PAG.

PROPER INSTALLATION & MAINTENANCE

Improper installations or any unguided product hampering is not a responsibility of PAG. It is the responsibility of the buyer to ensure the fitness of hardware for the intended purpose. We recommend assessment by appropriate testing in the application and by technical enquiry to our representatives or by understanding the manual provided with the product. Products may be sharp edged or blunt and heavy. Please handle with proper handling techniques and please keep all products away from the reach of children during or before installation. Keep the products in good condition and avoid contact with chemicals, water, paste, dirt and abuse to increase the life of the product. Finishes treated with protective coatings quickly deteriorate if the surface is broken. To prolong the life and maintain the original beauty of the material and the finish, it is important to avoid the use of paint removing solvents, acids, ambro tapes or other strong caustic cleaning solutions. Before painting doors, frames & woodwork. All hardware items should be removed and re-installed after the paint is dry.

BACK CHARGES

PAG is not responsible for, does not authorize, and will not accept any back charges for the cost of any labour or material incurred by anyone other than PAG for any repair, service, installation or replacement unless approved with PAG's prior written consent.

RETURNED GOODS

PAG will not accept any return goods under any circumstances except manufacturing defects or warehouse mistakes. Customer has upto one year from the date of invoice to return the goods in this case and all goods must be returned in original packaging and be in resalable condition, i.e. unaltered and non-degraded condition along with prior approval. Transportation charges of returned goods must be prepaid by the customer. Product not returned in saleable condition or after 1 year of issue date is subject to disposal by PAG with no credit issued.

WARRANTY

We provide a warranty of one year only on all products for manufacturing defects except electric and electronic products. Plating and Corrosion is not covered under the warranty subject to installation as per PAG standards and guidance by PAG India technicians.

KEYING INSTRUCTIONS

All orders of keying systems should be specified in writing including all the keying types of master key, grand master key etc. Supply of additional master keys and common keys would require the cylinders to be with PAG and would take minimum one week and maximum two weeks for fulfillment of the orders. Keying orders will not be cancelled, replaced or returned once issued.

CRYSTAL COMBINATIONS

All crystal hardware are made from Swarovski Crystal Elements (Austria) except products Q0155 and Q0158. All crystals are subject to availability from Swarovski. Clear, Blue, Red, Green, Pink & Black crystals are subject to variations and availability from Swarovski Strass , Austria. All crystal handles and accessories are on "made to order" to basis. Ready stock may or may not be available.

MRP STICKER

We have pasted MRP stickers on all products and liability arised due to missing MRP sticker will be borne by the buyer.

ENQUIRY

All enquiries to PAG can be made by phone, email, web, sms, mail, courier for products in the List or outside the list.

PAG has prepared this Installation and Maintenance Guide to assist the Architects in his selection of, the Contractor with his storage and fixing of, and the Maintenance Staff with their correct approach to maintenance and adjustment of PAG hardware products. As quality products have been chosen, it is essential they are stored, fitted and maintained correctly in order to ensure the highest level of performance during the whole of their working life.

Storage

All PAG items are carefully packed before delivery to avoid transit damage. On receipt at site it is essential that all ironmongery is stored in a dry environment prior to installation. After installation, it is recommended that the ironmongery is protected until the construction phase is completed.

Installation

PAG products are of high quality and it is necessary that they are installed according to the appropriate fixing instruction. Fixing instructions and templates are supplied with standard products. With regard to installation of PAG products it is recommended to use the appropriate boring tool. Additionally, it is advisable to use an electric screw driver. No substitution of fixings should be undertaken without prior reference to PAG. Any such substitution may invalidate performance statements given or implied inproduct literature and/or fixing instructions. The correct installation of all items of ironmongery is essential to achieve the performance levels stated.

Maintenance

On installation, where the correct procedure, as per the instructions, has been carried out the lever and knob handles will not require adjustment. However, all fixings should be checked for tightness at the annual control. Any loose fixings should be adjusted. Badly fitted furniture can cause interference with the operation of the hardware products and, at the same time, damage the bearing surface of the furniture.

Care of Finishes

Today's environment exerts immense pressures on product material requirements. Products must withstand a diversification of atmospheric conditions, such as high pollution, marine locations, high humidity climates. Additionally, products must be protected against cleaning agents/solutions and ideally the product should offer hypo-allergenic properties. The products made by PAG, if taken adequate care will last for a long time.

Cleaning Technique

It is important to clean all metals regularly. Initially, wipe down the surface using wet cloth with plain water. To complete the cleaning procedure dry/polish the item with a soft, dry cloth. Within aggressive conditions, such as offshore, marine and swimming pool environments, it is especially relevant to ensure that cleaning maintenance occurs regularly.

Discolouration

If spots appear on the surface it is not due to the product or metal, but to impurities in the water, the air or to cleaning agents that have been used to clean the surface. Spots can be avoided by careful cleaning. If discolouration or spots occur they can be removed by using special polishing agents or scrubs. Again rinse thoroughly with clean water and polish with a soft, dry cloth.

What to avoid!

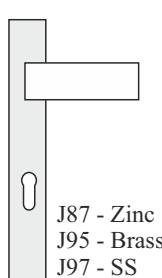

Scouring powders, Steel wool, Strong abrasive materials, Acid based cleaning solutions, sharp objects, dusty environments, heated and closed environments moisture.

Example Product Code : **G 94 01 Clear CP LxK**
 Part No. I II III IV V VI

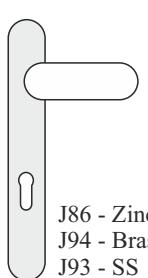

Part I - Type of Handle

- A** - Main Door Pull Handles
- D** - Entrance Handlesets with One Pull and One Mortise
- G** - Mortise Handles on Rose

How to Estimate Wooden Door Weights

Average Weight of Wooden Door KG per square feet

Door Thickness	32mm	38mm	45mm	50mm
Solid Teak Door	2.07	2.48	2.89	3.30
Flush Door	1.55	1.86	2.17	2.48

For Selection of Door Closer, Safety factor should be taken as
1.5

How to Estimate Glass Door Weights

Average Weight of Glass Door KG per square feet

Door Thickness	6mm	8mm	10mm	12mm
Toughened	1.39	1.85	2.31	2.78

For Selection of Floor Spring, Safety factor should be taken as
2

Estimated Frequency of Operations

Door situation	Estimated number of operations
High frequency heavy duty situations	Daily Annually
Large department store entrance	5000 1500000
Large office building entrance	4000 920000
Cinema or theatre entrance	1300 455000
School entrance	1250 225000
Entrance door to school toilets	1250 225000
City centre shop entrance	1000 300000
Large city bank entrance	1000 250000
School corridor fire door	600 108000
Town bank entrance	500 125000
City centre restaurant entrance	500 150000
Large office corridor fire door	450 104000
Town centre shop entrance	400 120000
Large office/factory toilet entrance	400 92000
Hospital ward door	350 128000

Medium frequency medium duty situations	Daily	Annually
School classroom door	80 15000	
Office door	75 18000	
Store/toilet door	60 18000	
Dwelling rear or side entrance	15 5400	
Dwelling front entrance	12 4400	

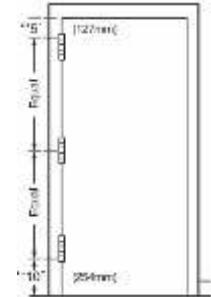

low frequency light duty situations	Daily	Annually
Bedroom Door	15 5400	
Bathroom Door	12 4400	
Entrance Door	30 10800	

Adjusted Door Weight Calculation Table for Hinges

Weight	Door of excess width, please refer to slide loading calculation table	= Adjusted Door Weight	Factor	Normal Increase of Mass of Door Leaf %
	Door Closer +20%			
	Door Closer (Hold Open) +75%			
	Extra Heavy Use +10%			
	Light Use -10%			

Use of Hinges

Normally 3 Hinges are fitted to each door. Their Positions are determined by the weight of door and its resistance to warping or whipping. Hinge specification is also determined. The standard position is as mentioned in the diagram aside

Pag recommends all doors over 4 foot wide should have a minimum of 4 hinges, irrespective of height. Doors over 8' and 4' wide should have a minimum 5 hinges per door

Wider doors obviously increase the stresses exerted on the hinge. This must be allowed for by a reduction in the maximum mass of the door leaf supported by each class of hinge. The factors by which the door mass has to be adjusted for excessive widths are calculated by dividing the door height by its width. For a factor of 2 or greater, no allowance has to be made. The percentage leaf mass increases are shown in the Side Loading calculations in the table here.

Adjusted Door Weight

Calculating the Adjusted Door weight enables the correct size of hinge to be specified.

Example 1

Door leaf 2040 x 928 x 45mm x 65kg door in school corridor with hold open door closer 65kg + 75% (hold open door closer) + 10% (Heavy use) = 125kgs adjusted door weight. Specify 4 x 3010 4x3x3 Hinges fitted per door leaf

Example 2

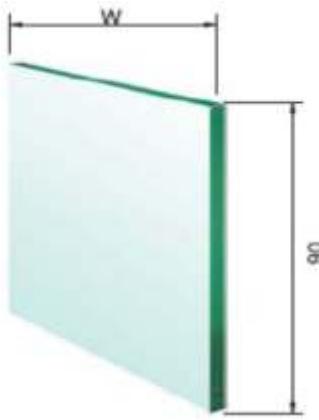

Door leaf 2040 x 1100 x 45mm x 75kgs on office door with non hold open door closer 75kgs + 15% (increased door width) + 20% (door closer) = 104 kgs adjusted door weight. Specify 4 x 3010 4x3x3 Hinges fitted per door leaf

Slide Load Calculations

Door Height (mm)	Door Width (mm)	Factor	Normal Increase of Mass of Door Leaf %
2000	1000	2	0
2000	1050	1.9	10
2000	1100	1.82	18
2000	1150	1.74	26
2000	1200	1.66	33
2000	1250	1.6	40

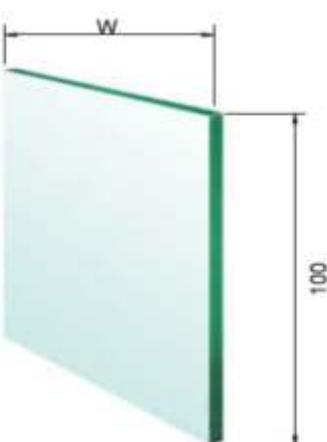

Glass Weight Calculation Formula	
Height (m) x Width (m) x 2.5 x Thickness (mm) = kg	
Example	
Height - 1.1 Metre Width - 1 Metre Thickness - 13.52	
Total Weight of Glass will be 37.18 Kg	

How to Estimate Glass Door Weights				
Average Weight of Glass Door KG per square feet				
Door Thickness	6mm	8mm	10mm	12mm
Toughened	1.39	1.85	2.31	2.78
For Selection of Floor Spring, Safety factor should be taken as 2 For Eg. If Glass Door Weight is 60Kg then floor spring weight capacity should be 120Kg

INSTRUCTIONS FOR MOUNTING

STEP 1. Mount closer body and catch

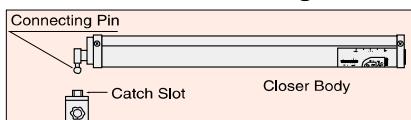

- (a) Attach closer body to upper crosspiece of doorway so that connecting pin overhangs edge of top jamb on side toward which door opens.

- (b) Attach mounting base and catch to upright of door frame on side toward which door opens.

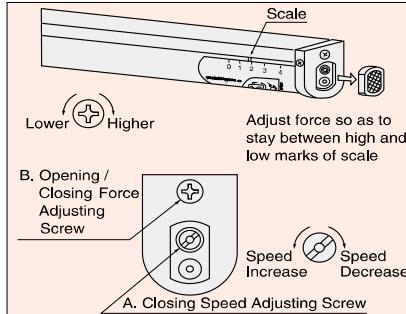

STEP 2. Insert connecting pin of closer body into slot of catch and tighten.

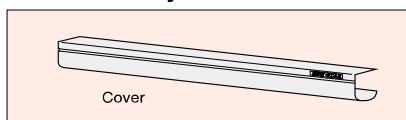

STEP 3. Checking and adjusting of closing action

- A. Speed Adjustment
- B. Opening/Closing Force Adjustment
 - Make adjustment within a scale range of 0 to 4.
 - Do not loosen the screw excessively, or otherwise the screw will fall off.
 - The scale is set to 2 before shipping.

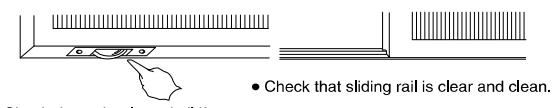

STEP 4. Attach cover to closer body.

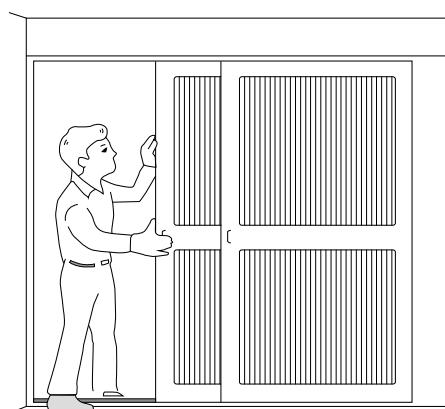

NEW★STAR

SINCE 1919

Before mounting doorcloser, check door is in good working order as follows:

- Check that sliding rail is clear and clean.

- Check alignment of doors with each other and with doorway frame.
- Check sliding action by lightly pushing door. It should close smoothly and rebound slightly.

DW×DH mm	Door Weight kg
900×2100	20~40

Never use the product in places with excessive dust or moisture, such as bathrooms, saunas, and swimming pools.

The Decorative Straight Strap Barn Door system features a classic face mount flat strap to hang wood doors on a traditional rail track. Large wheels provide excellent strength and durability.

We have taken an original concept to offer three fashionable and high-end kits in the contemporary finish of Matt Black. Barn door hardware has a matt black finish and is made of steel.

Decorative hardware supports single door with a thickness of 1-3/8 in.;

Maximum weight up to 250 lbs. 150Kg

Ideal for openings up to 36 in. wide and openings wider than 36 in. require multiple tracks

Wheels provide excellent strength and durability as well as smoothness of travel along the rail

Anti-jump discs prevent hanger wheels from jumping off the track

All mounting hardware included
